

# Still using yesterday's tech for today's challenges?

In today's fast-paced world, technology is evolving at an unprecedented rate. Businesses that fail to keep up with these advancements risk falling behind, facing inefficiencies, increased costs, and potential security threats.

To keep up with the pace of technological change, you need a single composable platform with industry expertise and embedded innovation, not to mention being 'forever evergreen' with rapid access to continuous innovations and experiences.

Let's start your upgrade journey to IFS Cloud today!

## Why IFS Cloud?

### Step into the future

IFS Cloud is a modern, agile, composable platform to meet your future needs. As your business grows, transforms, innovates and shifts to new models then remaining on legacy solutions is not going to support the organization. To step into the future, you need IFS Cloud.

### Experience industry expertise

Harness industry-specialized processes, capabilities and dashboards to achieve optimal performance. IFS Cloud provides new innovative technology in real industry contexts.

### Embedded innovation

Leverage IFS.ai's transformative technologies embedded into IFS Cloud. Eliminate complexity and realize practical innovation quickly and efficiently.

### Remain evergreen

Experience rapid access to continuous software innovations and experiences. Adopt updates on a schedule under your control, harnesses the six-month cycles to remain evergreen.

### Don't hold your business back

Running multiple systems can cause inefficiencies, costs, cyber threats, productivity and compliance risks. IFS Cloud provides your business with the visibility, compliance and security it needs across all aspects, from finance and CRM to EAM and ESG.

### The power of AI

Take advantage of the power of AI, and an Industrial AI strategy on IFS Cloud. Harness the benefits of embedded AI, and the business value of joining vast data sources together and using AI to drive automated decision making.

### Don't fall into technology drift

To meet constant changes, you need additional functionality. Using legacy systems means you are missing out on functionality and potential organizational growth.

Every six months, IFS adds new enhancements to IFS Cloud, meaning that you can add to your platform whenever you're ready - meaning you will avoid being stuck in the past.

### Invest into your future

IFS Cloud provides your organization the ability to take advantage of next generation cloud technology as well as new and additional features that IFS have built or acquired to enhance your business.

By upgrading to IFS Cloud, you're not just investing in a platform; you're investing in a future where your business can thrive, adapt, and excel in an ever-changing landscape.

Let's start your journey to IFS Cloud, future-proofing your business so you can stay ahead of competition
